WHERE SHOULD
WE FOCUS
THIS YEAR?

"BLOCKCHAIN"

IT WILL
CHANGE
EVERYTHING.

EVERYBODY
IS TALKING
ABOUT IT.

THE POTENTIAL
APPLICATIONS
ARE ENDLESS.

WE DON'T
WANT TO BE
LEFT BEHIND.

WHAT
EXACTLY IS
BLOCKCHAIN?

ALSO,
"ARTIFICIAL
INTELLIGENCE"

*Dear CEO,
If your board of
directors are not
asking you about
your company's
AI strategy,
then you need
to appoint new
board members.*

The Avatar Robot

Avatar Robots that can virtually transport people skills

The robot relies on cameras, sensors, motors, and AI. These tools help to navigate its surroundings and move like a human.

Navigation in hostile environments

Dexterous capability let the robot make coffee, or align a communication antenna.

Dexterous capability

A human operator can controls the robot from Earth, using a VR globes and exoskeleton. Shared Autonomy facilitate time-delayed telepresence

Avatar or Robotic Telepresence

State of the Art Avatar Technology

AxonSkin interior lining
• Thermal and tactile feedback

Two-piece suit with gloves and boots
• Full-body coverage

Quick "snap" connectors
• Pair AxonSuit with AxonStation

AxonSkeleton

- Force-feedback exoskeleton
- Pairs with AxonSuit

Motion simulator

- Four-axis rotation
- Enables unlimited locomotion

State of Art: Mining Industry

Drones and Autonomous Vehicles

Teleoperated trucks remotely bring safety, productivity and availability in difficult or remote locations.

Exoskeletons

Exoskeletons reduce the human effort and reduce body risk

Semi-autonomous LHD

Safety and productivity benefits, with machines operated remotely and automatic operations.

Mining industry 4.0

Networks and IoT for connect all processes and operations.
